The NHS is reeling under the pressure of the new market structures and financial restrictions introduced by the 2010-15 Coalition government and reinforced by the current Conservative government.

What is the impact in Sheffield and what can we do about it?

How can the NHS change and improve without alienating the staff whose dedication is essential to its survival, most recently the junior doctors? Who will be next?

Find out the latest news and what can be done in solidarity.

Help us by contributing your news and views and being part of developing our action plan.
