

STOP THE GOVERNMENT WRECKING OUR NHS

There is no excuse for ambulances having to queue to deliver patients to A&E, seriously ill, scared people stuck on trolleys in corridors all night waiting for beds, most operations cancelled through January, mental health patients transported hundreds of miles from home.

**SAVING LIVES
COSTS MONEY**

**SAVING MONEY
COSTS LIVES !**

Our NHS is being starved of funds, broken up and sold off

on the pretext that we can't afford decent health care in the 6th richest country in the world! The UK has 40% less hospital beds, 30% fewer doctors and spends less per head

on health care than the EU average. Bed occupancy is way above the 85% considered safe. Staff are over-stretched and demoralised trying to cover over 80,000 vacant posts after eight years of frozen pay.

Demand the Government restores NHS funding now and commits to 4% annual increases they abandoned in 2010, end the pay cap and reverse privatisation

Resist cuts, closures, outsourcing and the sale of NHS land and assets to plug deficits

Insist local councillors refuse to support the creation of Accountable/ Integrated Care Systems, which will break up the NHS and fast track privatisation
