

Tell Homerton Hospital: Don't use Palantir !

Palantir is a U.S. company specialising in AI- powered military and surveillance technology. They work with Trump on migrant deportations and with Israel on their deadly assault on Palestinians. Also, our personal health data is not safe with them.

Despite this, the NHS has signed a national contract with Palantir to run a central system for our health data.

Homerton Hospital can still choose not to take part.

Tear off and sign the card below, and give to us or send to the Homerton Chair and Directors, to tell them: **SAY NO TO PALANTIR**

Dear Chair and Board of Homerton Hospital

I am a Hackney resident / Homerton patient/ Homerton staff member. I strongly oppose Palantir's involvement at Homerton Hospital.

I do not trust them with my personal health data. Their involvement with the Israeli military in their devastation of Gaza, and U.S. surveillance of migrant and minority communities is deeply concerning.

A contract with Palantir is incompatible with Homerton's ethical commitments. Homerton has a choice about working with Palantir. **They are NOT the right partner for our hospital.**

We love our local hospital — it must remain public, ethical, and secure.
